FOR IMMEDIATE RELEASE

SKYLINE SOFTWARE SYSTEMS OPENS ANOTHER EUROPEAN OFFICE

Herndon, VA – September 25, 2017 – Skyline Software Systems Inc. announced today that it is expanding its operations by opening a sales office representing the company in German speaking countries (“DACH” region) and Central, Eastern and Southern Europe. The office is located in Germany.

Tomas Orlik has been named as the General Manager of SkylineGlobe GmbH. Tomas has 20+ years of experience in the GIS industry gained in his own company, GCWare, with Intergraph Corporation and in various startups, where he was active in the last couple of years.

“With the increase in demand for 3D Geospatial Systems in German speaking countries and Central, Eastern and Southern Europe, we are excited to have a local office to service our clients in more than 20 countries. Tomas has a rich background in GIS systems and applications that will help our customers greatly,” remarked Skyline Software Systems President Robert Peters.

SkylineGlobe GmbH joins the company’s other international sales and support operations including: SkylineGlobe, Ltd in the United Kingdom, SkylineGlobe plc in Australia and SmartEarth, a joint venture in China. Combined, these centers provide a global team to better support customers in their regions of the world.

SkylineGlobe software suites set the standard for 3D desktop and web-based applications, enabling an enterprise to build, edit, navigate, query and analyze realistic 3D environments and rapidly and efficiently distribute them to users. SkyGlobe packages include all the software necessary to set up your own customized, privately-hosted 3D visualization solution. Flexible deployment options allow you to scale your solution as required from ten to tens of thousands of users.

About Skyline Software Systems

Founded in 1997, Skyline Software Systems, Inc., a US company, is a leading provider of 3D earth visualization software and services. The company offers a comprehensive platform of applications, tools and services that enable the creation and dissemination of interactive, photo-realistic 3D environments. Skyline has built a “best of breed” set of tools that remain focused on the needs of its customers including flexibility, efficiency and robustness. More information is available at www.skylineglobe.com and on the company’s [Skyline YouTube Video Page](#).
